

# York Flood Alleviation Scheme: Tree Felling for Flood Improvement Work

We are increasing the height of the flood defences in the Marygate area to better protect 56 homes and businesses from flooding

## We must remove 14 trees to complete this work

13 Trees are planned for removal at this time. This is to prevent the trees from damaging the improved flood defences, and to allow space for construction.

## Wildlife and noise considerations

We will carry out checks to ensure that we do not disturb nesting birds. If a nest is found, we will not remove trees until the nest is inactive. Works will take place on week days between 8am and 6pm

## For every tree removed, we will plant five

We will plant as many trees here as possible. Remaining trees will be planted elsewhere within York.
